DETAILED ACTION

Claim Rejections - 35 USC § 112

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is incomplete in failing to structurally connect the recited "power circuit, a direction selection circuit, an encoder circuit, and a transmitting circuit as well as the second power circuit , a receiving circuit, a decoder circuit, a comparator circuit, a light driving circuit , and a directional light emitting unit..

Allowable Subject Matter

Claims 1-10 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Raz et al, Pories et al, Morse, and Henderson et al are cited as showing related turn signaling arrangements .

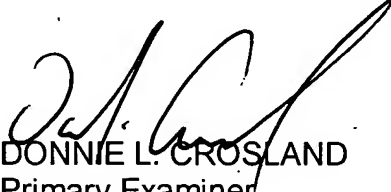

The claims define over these references in reciting the combination and a comparator circuit.
